

LEAKY DUCTS are Costing You MONEY

TEST & SEAL LEAKY DUCTWORK

Incentives & Rebates
May Apply in Some
Utility Territories.

HIGH UTILITY BILLS? STUFFY ROOMS? DUSTY BUILDING? IT COULD BE YOUR HVAC DUCT SYSTEM

Save Money According to the US EPA - Energy Star program, leaky ducts can reduce the furnace and AC system efficiency by as much as 20%.

Improve Comfort Sealing and insulating ducts can make your home more comfortable, by efficiently distributing conditioned air.

Enhance Indoor Air Quality Sealing ducts can help improve indoor air quality by reducing pollutants entering the ducts.

Protect the Environment Most of your home's energy comes from fossil fuels. Sealing your ductwork reduces your energy use, which lowers the carbon emissions that cause climate change.

Commercial and
residential
systems save up
to 20% on energy
bills immediately

What we do
Our core business is renewables and energy efficiency.

Why we do it
We believe energy production and consumption must fundamentally change.

How we do it
We design and install systems to save the planet and save you money.

Does your Duct work look like this?

Duck tape is not for Ducts!

Seal out leaks, get 20% more energy efficiency

Save energy, money, and the planet!

In typical buildings, more than 20% of the air in the duct system is lost through leaks, holes, duct seams, and poorly-connected joints

Proper duct maintenance means more even heat distribution throughout your property. No more cold spots!

Long experience, superior service

- We brush- and towel-clean your buildings duct seams, remove aged sealing materials, and review the integrity of your entire duct system.
- We re-seal your ducts with the highest quality sealing compound, Carlisle Hardcast.
- Carlisle Hardcast is an industry leading HVAC sealant that is both EPA and LEED approved and contains no flammable material.

International Building Code now requires all new HVAC installations be sealed

Carlisle HVAC exclusive brand products deliver outstanding product warranties and results. Start saving today.

AEI provides fully accredited AUDITING and WEATHERIZATION services. Our staff is BPI (Building Performance Institute) certified and can test, interpret, design, manage, and implement energy saving techniques for residential and commercial properties.
